The essentials of imaging

Our Commitment to the Environment

- Konica Minolta’s Environmental strategy has been an Integral part of our business for over 30 years. More than just being environmentally aware, we combine environmental sustainability into our operations and encourage the same of our partners and clients.
- Our business machines are among the most environmentally efficient available. They are more energy efficient, use less toner, and produce less greenhouse gas emissions than ever before.
- We are one of the first companies to be presented with the international “Blue Angel” award in recognition of our integrated commitment to environmentally sustainable business practices. Our Environmental strategy includes the following initiatives: Continue to hold international accreditation for the ISO 14000 International Standard for the Environment.
- Contribute to and promote the Planet Ark recycling program for used toner cartridges, ‘Close The Loop’, which saves tonnes of landfill waste per year.
- Continue to promote materials recycling, low noise, carbon monoxide emission and heat emission caused by our products.
- Continue to further refine our manufacturing process, which targets zero waste. We have already decreased water usage, reduced greenhouse gas emission and hazardous chemicals usage dramatically in the past 6 years.
- We will continue to devise ways to minimise the carbon footprint of our products and operations – as part of our commitment to a greener planet for our clients, staff and partners. Here are some of the environmental milestones that Konica Minolta has achieved:
 - Machine parts and components are fully recyclable
 - 7 production facilities create zero waste
 - ISO 14001 & ISO 9000 certified
 - ‘Energy Star’
 - ‘Blue Angel’ (Nordic Swan) (German Blauer Engel)
 - Japan’s Agency for Natural Resources and Energy - Energy conservation grand prize
